The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. Continuation of 13. Other: The amendments to the claims do not put the claims in condition for allowance as the claim recites that the outer rail has a yield point exceeding that of the base rail. The outer rail of Pelletier is constructed of stainless steel while the base rail is constructed of aluminum, the applicant argues that these two materials have yield points opposite of the instant claims. According to the Machinery's Handbook 25th edition (1996) p. 193 Aluminum is shown to have a yield point of 60 with stainless steel having a yield point of 78 therefore exceeding the yield point of aluminum. Applicant appears to argue both the yield point and yield strength as if they are the same. While the two are related they are in fact considered separate properties of a material.
